## DETAILED ACTION

### *Election/Restrictions*

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 18-29, drawn to combinations of MIA with matrices and osteoinductive agents and methods of administering them.

Group II, claim(s) 30-32, drawn to methods for gene therapy.

MIA, BMP-2, BMP-7, hedgehog proteins, and biocompatible matrices are all known in the art, as Applicant indicates in the specification, and do not constitute linking technical features. Thus there is no single general concept linking the two inventions. Group I is drawn to protein compositions and methods of administering them, while group II is drawn to methods of generating and administering expression vector. Thus the reagents and method steps required are different.

Clarification of what is intended to be claimed in claims 33 and 34 and identification of the group to which these claims belong is requested. Part of claim 33 has been omitted and the nature of the invention is unclear. Part of claim 30 has been similarly omitted but the claim has been interpreted as drawn to methods of manufacture and use of expression vectors.

This application also contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species of co-administered agent:

a) biocompatible matrix

Art Unit: 1646

- b) BMP-2
- c) BMP-7
- d) hedgehog protein
- e) matrix + BMP-2
- f) matrix + BMP-7
- g) matrix + hedgehog protein

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following manner:

- a) 18, 23, 24
- b) 19-22, 30, 31, to the extent that they read on BMP-2
- c) 19-22, 30, 31, to the extent that they read on BMP-7
- d) 19-22, 30, 31, to the extent that they read on hedgehog proteins
- e) 25-29, 32, to the extent that they read on BMP-2

Art Unit: 1646

f) 25-29, 32, to the extent that they read on BMP-7

g) 25-29, 32, to the extent that they read on hedgehog proteins

No claim is generic. As stated above, the Examiner is unable to interpret claims 33 and 34 and clarification is requested.

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: As stated above, each of the agents to be administered is known in the art. Thus there is no linking special technical feature. Further, each of these combinations involves different molecules with different structural and functional characteristics, requiring different searches and different considerations.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

All Internet email communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark Office on February 25, 1997 at 1195 OG 89.
